

Multi-layered Plastic Packaging (MLP) Is Good For Mankind...!!

Multi-layered plastic packaging (MLP) is 100% recyclable with least consumption of Energy & Water...!!

Flexible Packaging's features make life more convenient...

Easy to Open

Easy to Re-seal

Easy to Carry

Easy to Store

Extends Product Life

Manufacturing a can for packaging coffee consumes **+1605%** more water than a flexible pouch

A flexible Juice pouch uses much lesser packaging with a product-to-package ratio of almost **+97%**

A rigid container (Tin/Glass) emits **+380%** more greenhouse gases than a flexible pouch with zipper or spout

To transport the same amount of product it only takes **1 truck** of unfilled flexible packaging compared to **more than 25** truckloads of unfilled glass jars

imagine the amount of fuel saved and Co2 emission controlled

Flexible Packaging Entrepreneurs' Welfare Association

PACKVISION CONFERENCE

DATE: 8th & 9th September, 2018

VENUE: Radisson Blu, Agra
