# Product Stewardship Policy

## Preamble

UFlex Limited (hereinafter referred to as "UFlex", "the Company") aims to design products which may be used safely throughout their lifecycle.

## Purpose

The purpose of Product Stewardship Policy ("the Policy") is to ensure that health, safety, and the environment are protected at every stage of a product development, from initial research and development to manufacturing. This Policy lays out guidance on responsible handling and usage of the products, thereby contributing to the upkeep of a safe and healthy environment. This Policy strives to provide measures for continuous improvement in the practice of product stewardship.

## Scope and Applicability

The scope overall ranges from the research in the laboratory to its manufacture, distribution, usage, and the overall management. This Policy applies to all business units of UFlex in India.

## Definitions

**"New Product Development"-** is the process defining the activities for developing new products from idea to market.

**"Product Stewardship"-** is the responsible and proactive management of the health, safety, and environmental aspects of a product throughout its lifecycle".

**"Product Lifecycle Management"-** means activities related to product introduction, evaluation and modification during the product lifetime and product withdrawal from the product portfolio.

## Commitment

The Company shall:

- Comply with all applicable and relevant laws, rules, and regulations.
- Periodically conduct product stewardship awareness programs and engage with its customers to achieve optimal outcome out of these programs.
- Ensure product integrity by implementing sound quality assurance and control measures.
- Ensure all production sites (owned or contracted) apply requisite safety standards.

## Policy monitoring

The policy shall be reviewed periodically and any amendments to the same shall be approved by the Board of Directors.
