

PRESS RELEASE

Uflex value - engineers different variants of Extrusion Lamination Machine

Noida, 18 May 2017: In the absence of quality manufacturers of Extrusion Coating/ Lamination machines in India, responding to an ever increasing demand from the Convertors' fraternity, India's largest multinational flexible packaging materials and solution company Uflex had launched Extrusion Lamination Machine EL-1300 in India, last July.

The machine received great feedback from Indian convertors and turned out to be a huge success. Innovation to create value added differentiation being the guiding vector at Uflex, the quest for re-engineering to come up with something more evolved and endearing for convertors to address their needs towards various types of applications continued.

Mr. Ajay Tandon, President & CEO, Engineering Business, Uflex Limited said, *"This re-engineering and value addition gave birth to extrusion coating / laminators as **Mono Extruder, Co-Extruder and Tandem Extruder** variants.*

To meet the principal application of extrusion coating / lamination, Mono Extruder is good enough. However, considering the running costs and flexibility to play with various polymers, Co-Extruders are getting increasingly popular. In addition to economising the costs, Co-Extruders also play an important role towards enhancing barrier properties owing to multi-layered combination. Tandem Extruder has been designed so as to execute multi-layered jobs in single run for saving upon the process time.

The fact that in addition to the delivered machine four more machines are being currently manufactured at our plant in Noida proves the credibility that Uflex as a manufacturer of Converting and Packaging machinery enjoys.

We have a powerful feedback loop that helps us tapping the pulse of the market at all times. It is for this important feedback which we received from the Convertors' fraternity that we were able to give unparalleled features to the extrusion coating / laminators including auto adjustment of the silicone belt, movement of Extruder / T-Die in three axis...x-y-z, possibility of top and bottom splicing to name just a few.

The moment of truth dawned upon us when our Extrusion Lamination Machine EL-1300 was highly appreciated not only by domestic convertors and professionals from the industry but also by one of the leading manufacturers of extrusion coating machine from the West”

Expressing delight upon this development, Mr. Ashok Chaturvedi, Chairman & Managing Director, Uflex Limited said, *“Only successful engineering is potent enough to quell the thirst for innovation. I am glad that my team has been able to add discernible value to the existing extrusion lamination machine by further engineering **Mono Extruder, Co-Extruder and Tandem Extruder** variants for meeting multifarious needs of convertors. Let me tell you that more value engineering on this front is in the offing and you shall hear from us about it in the near future.”*

About Uflex

Uflex is India’s largest multinational flexible packaging materials and Solution Company and an emerging global player. Since its inception back in 1985, Uflex has grown from strength to strength to evolve as a truly Indian Multinational with consumers spread across the world. Uflex today has state-of-the-art packaging facilities at multiple locations in India with installed capacity of around 100,000 TPA and has packaging film manufacturing facilities in India, UAE, Mexico Egypt, Poland and USA with cumulative installed capacity in excess of 337,000 TPA.

All Uflex plants are accredited with ISO 9001, 14001, HACCP & BRC certifications. Uflex caters to markets spanning across the globe in over 140 countries like USA, Canada, South American countries, UK and other European Countries, Russia, South Africa, CIS, Asian and African nations. Integrated within its core business profile are allied businesses like Engineering, Cylinders, Holography and Chemicals which further give Uflex a superior edge above competition.

Uflex Limited is also a part of the D&B Global Database and winner of various prestigious national and international awards for its products’ excellence. Uflex offers technologically superior packaging solutions for a wide variety of products such as snack foods, candy and confectionery, sugar, rice & other cereals, beverages, tea & coffee, dessert mixes, noodles, wheat flour, soaps and detergents, shampoos & conditioners, vegetable oil, spices, marinades & pastes, cheese & dairy products, frozen food, sea food, meat, anti-fog, pet food, pharmaceuticals, contraceptives, garden fertilizers and plant nutrients, motor oil and lubricants, automotive and engineering components etc.

Some of Uflex’s clients on the global turf include P&G, PepsiCo; Tata Global; Mondelez, L’ Oreal, Britannia, Haldiram’s, Amul, Kimberly Clark, Ferro Rocher, Perfetti, GSK, Nestle, Agrotech Foods, Coca Cola, Wrigley, Johnson & Johnson among others.
