

**PRESS RELEASE**

**New Solvent-Less White Adhesive by Uflex gives Convertors a reason to Cheer**

**11 May 2018, Noida, Uttar Pradesh (India):** The Chemicals Business of India's largest fully integrated multinational flexible packaging materials and solution company Uflex Limited has launched a general-to-medium performance 2K solvent-less PU adhesive FLEXBON 901A/901W that is expected to enable laminators and brand owners to reduce their application cost and substantially enhance their performance by partially replacing white inks, and meet consumer demands.

The Chemicals Business of Uflex is a leading provider of adhesives, printing inks and coatings for a wide range of flexible packaging applications.

This solvent-less white adhesive works well on existing solvent-less lamination machines and will reduce the requirement of white ink coating on printed substrates, thereby giving substantial savings to converters. This product offers excellent opacity and wettability on metallized substrates. Other key features include good adhesion; suitability for low temperature applications (35 to 45 degrees C); and the ability to provide fast decay of primary aromatic amine.

Talking about the new product, Mr. Rajesh Bhasin, Joint President, Uflex Chemicals said, **“This innovative and valued development substantially enhances our solvent-less adhesive portfolio. Given the myriad benefits that this adhesive brings for the convertors, we will market it globally. The demand is encouraging already.”**
