UFlex to Showcase Sustainable Tubes Incorporating USFDA-Approved Recycled Content at CMPL Expo 2025

Noida, July 07, 2025: FlexiTubes, the tube packaging division of UFlex Ltd.—India's largest multinational flexible packaging and solutions company is set to showcase its sustainable tube solutions made using USFDA-approved Post-Consumer Recyclate (PCR) at CMPL Expo 2025, Asia's largest event for FMCG contract manufacturing and private labels. The exhibition will take place at the Jio World Convention Centre, Mumbai, from July 9–11, 2025.

As sustainability continues to take center stage in the packaging industry, FlexiTubes will spotlight its PCR-based tube solutions—GREENIKA. UFlex was recently certified by the USFDA for its recycling process, allowing the company to use recycled polyethylene (rPE) in packaging applications. This

certification marks a significant milestone and reinforces UFlex's commitment to promoting a circular economy and reducing plastic waste. What sets these tubes apart is that the raw material used in the PCR tubes is sourced internally through UFlex's integrated recycling and manufacturing infrastructure, ensuring consistent quality, supply reliability, and a reduced environmental footprint.

FlexiTubes ensures that its PCR tubes retain all core packaging features—including high-definition reverse rotogravure printing and diverse decorative finishes. This allows brands to maintain strong shelf appeal while adopting more sustainable solutions.

With excellent barrier properties, optimal product protection, and compliance with global regulatory and safety standards, these PCR-based tubes offer an ideal solution for brands looking to integrate sustainability without compromising on performance or aesthetics. They equip brand owners to align with their Extended Producer Responsibility (EPR) goals, which are a growing priority across markets.

Alongside GREENIKA, FlexiTubes will also feature its signature sustainable tube formats—Earthika, Kraftika, and Remika—each tailored to address different environmental goals, including recyclability, biodegradability, and reduced carbon footprint.

Visit FlexiTubes at Booth A158, Pavilion 3 at CMPL Expo 2025 to discover the future of food-safe, sustainable tube packaging—where innovation meets environmental responsibility.

CMPL Expo is Asia's premier platform for FMCG contract manufacturing and private labels, attracting key stakeholders from D2C brands, packaging suppliers, contract manufacturers, ingredient providers, and brand owners across categories including food and beverages, beauty, healthcare, and more.
