Key Highlights

Chairman's Message

Mr. Ashok Chaturvedi, Chairman and Managing Director, UFlex Limited, said, *"We have started FY27 with robust financial and operational performance, delivering consolidated PAT of Rs. 4,233 million in Q1. Revenue stood at Rs. 53,972 million and EBITDA at Rs. 9,198 million. Our diversified portfolio, integrated capabilities and strong presence across key global markets continue to strengthen our competitiveness. We witnessed strong performance in our core packaging business, supported by improved volumes, higher capacity utilization and enhanced operating efficiencies across key markets.*

The commissioning of our recycling facilities in Noida and our Mexico WPP bags facility, together with the upcoming Egypt aseptic packaging facility, marks an important step in expanding our global manufacturing footprint and strengthening our ability to serve customers across high-potential markets. India's consumption environment is showing signs of a broad-based recovery, with improving FMCG volumes, while globally, consumers are increasingly prioritizing value, sustainability and convenience.

With our expanding capacity, technology leadership, innovation, operational efficiency and growing global footprint, we are well positioned to deliver sustainable and profitable growth in FY27 and beyond".

Ashok Chaturvedi
Chairman and Managing Director

President, Finance & Accounts And CFO's Message

Mr. Arun Kumar Sharma, President, Finance & Accounts and CFO, UFlex Limited, said, *"Q1 FY27 marked a clear acceleration in our profitable growth trajectory, building on the strong momentum established in Q4 FY26. Consolidated revenue grew 37.6% YoY to Rs. 53,972 million, while EBITDA increased by 92.1% YoY to Rs. 9,198 million. This helped in expanding our EBITDA margin to 17%, the highest EBITDA level in the last 21 quarters. Growth was driven by operating leverage, stronger realizations, improved product mix and forex gains, reflecting the benefits of our integrated global footprint.*

We enter FY27 with multiple growth levers gaining traction. The recently commissioned 39,600 MTPA recycling facility in Noida Sector 155 and the 80-million-unit WPP bags facility in Mexico will progressively contribute to revenue and EBITDA as they ramp up. Higher utilization led by localized sourcing to de-risk the unscheduled supply chain disruption and a shift towards value-added packaging films will remain our key growth themes, supporting sustained profitable growth. While Q2 is expected to see some normalization from the exceptionally strong realisation in Q1, our underlying growth trajectory remains intact, positioning us for robust FY27 growth and continued improvement in earnings quality. "

Industry Trends

UFLEX
'A part of your daily life'

Domestic

- India's consumption remained steady, supported by resilient FMCG volume growth.
- Packaging Films demand improved sequentially despite softness in April, as converters and brand owners gradually resumed purchases after deferring orders amid elevated prices in March and early April due to the West Asia crisis.
- West Asia conflict is disrupting packaging film raw material production and transit routes, driving up freight costs. In this backdrop, India's meaningful import dependence on MEG, Homo Polypropylene and other key feedstocks further tightens supply and elevates prices.
- Aseptic Packaging demand softened amid increased duty-free imports at aggressive prices in the domestic market, while overseas volumes were impacted by supply disruptions and delayed consignment deliveries due to the West Asia crisis.

International

- Strong Americas Packaging Films demand, supported by the US Government's push for domestic production and onshoring amid evolving trade policies; constrained imports from West Asia and India are expected to sustain the positive volume growth outlook.
- Europe witnessed stable sales volumes amid continued pressure from low-priced imports, with demand expected to moderate next quarter due to seasonal holiday.
- CIS BOPET Films sales benefited from steady demand, while CPP volumes were impacted by increased low-priced imports.
- Demand for BOPET and BOPP Film surged across MEA, driven by strong local and regional sourcing as customers de-risked supply chains amid the West Asia crisis; Egypt led the growth, while Nigeria benefited from robust export opportunities and improving domestic demand.

Consolidated Performance Highlights – Q1 -FY27

Revenue grew to Rs. 53,972 million (+31.7% QoQ, +37.6% YoY) in Q1 FY27, primarily driven by higher Packaging Films realizations from raw material inflation pass-through and local sourcing premiums, supported by volume growth, currency tailwinds and an improved product mix across Flexible Packaging and Value-Added Packaging Films.

EBITDA rose to Rs. 9,198 million in Q1 FY27 (+46.8% QoQ, +92.1% YoY), driven by strong contributions from overseas businesses, which benefited from localized sourcing premiums, particularly in Egypt Packaging Films & PET Chips, Mexico and Nigeria Packaging Films, along with India PET Chips business, with **EBITDA margin** expanding to 17.0% (+180 bps QoQ, +480 bps YoY), primarily driven by the overseas businesses, with Egypt, Mexico and Poland as key contributors, along with the India PET Chips business.

Normalized Profit After Tax (PAT) for Q1 FY27 was Rs. 4,233 million with **Normalized PAT margins** at 7.8%.

Q1 FY27 **Sales volumes** grew (4.0% QoQ and 1.7% YoY) to 173,471 MT, led by healthy Packaging Films growth of 6.4% QoQ and 4.9% YoY, while Packaging volumes declined 4.0% QoQ and 8.4% YoY, reflecting a strategic shift toward higher-margin products in domestic Flexible Packaging and softer Aseptic volumes amid aggressive-priced duty-free imports domestically, as well as supply disruptions and delivery delays overseas due to the West Asia crisis.

Virgin PET Chips: Consolidated third-party sales volumes increased 31.4% QoQ to 29,471 MT, led by India, which contributed 96.9% of the sequential growth, while Egypt contributed 3.1%; India volumes grew 41.0% QoQ and Egypt 5.0% QoQ.
